#### **8-CARDIOVASCULAR SYMPOSIUM , MARCH 7,2015 (INTERFAITH MEDICAL CENTER)**

## Comments and Suggestions

It was a very interesting program ,i have learned so much in the morning report ,in the round with the attending everyday, during the preparation of my présentations also i have learned a lot of things,i had the opportunity to see the use of surfactant ,I really appreciate the opportunity that I have to saw some materials that we don't have in Haiti and how to use them.

I would like that this program keep going and that more residents have this opportunity that I had and appreciate so much and I will share all that I have learned with the residents and the medical students in Haiti.

I thank again dr Patrick Leblanc, and dr Paul Nacier, for their devotion and support in making this externship a positive and good experience for me .

Thank You
